

H-CONNECTOR

Our stainless steel H-Connector is a practical solution for connecting ground protection mats on flat surfaces. This connector makes the process of joining mats much easier and more efficient. The stainless steel construction ensures durability and strength. Stainless steel is known for its corrosion resistance, making it suitable for outdoor use where the mats are most often deployed.

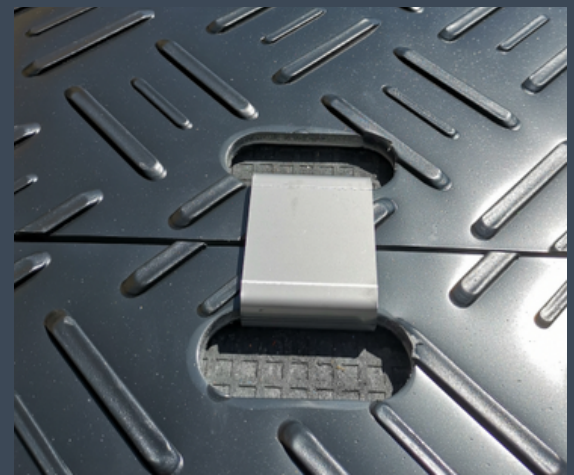

2 VERSIONS

Regardless of the thickness of your ground protection mats, the connector will be compatible with our handles and provide a secure connection.

Our small version is designed to fit mats with a thickness ranging from 8 mm to 15 mm, and our large version fits mats with a thickness from 15 mm to 22 mm.

For ground protection mats with:

- 4 handles (h4), you need 4 connectors.
- 2 handles (h2), you need 2 connectors.
