

# LOGO

You can order ground protection mats with your own logo and recycling logo. We use laser marking — a method where we simply burn off the top layer of the mats. This ensures that the mats are not weakened.

Please note that the simpler your logo is, the better the result will be. Contact us if you need assistance with a design proposal.

## PROCESS

- We redraw the logo
- We create a mockup
- The customer approves
- The logo is converted into a laser file and installed
- Order production begins

## REQUIREMENTS FOR FILES

Logos must be provided in the highest possible resolution. Vector files are ideal for easy and quick export of the correct file types. All files imported into the laser software must be in BLACK/WHITE and 2-tone.

Simple logos are preferred: 1-2 lines and not too many extra lines or boxes. The simpler the logo, the larger the print can be.
