

TERRA-GRID RC® 40

Terra-Grid RC® 40 is a high-performance grass and ground reinforcement panel made from recycled low-density polyethylene (LDPE). It is designed to reinforce grass and gravel surfaces while maintaining natural soil permeability.

Its interlocking system allows for easy installation, creating stable, drivable surfaces suitable for a wide range of applications.

APPLICATIONS

- Parking areas for residential, office, and industrial zones
- Access routes for emergency vehicles
- Pathways in parks, gardens, and playgrounds
- Golf course paths
- Temporary parking for cars, caravans, and trailers
- Service roads and temporary loading/unloading zones
