

H-CONNECTOR

Our stainless steel H-Connector is a practical solution for connecting ground protection mats on flat surfaces. This connector makes the process of joining mats much easier and more efficient. The stainless steel construction ensures durability and strength. Stainless steel is known for its corrosion resistance, making it suitable for outdoor use where the mats are most often deployed.

2 VERSIONS

Regardless of the thickness of your ground protection mats, the connector will be compatible with our handles and provide a secure connection.

Our small version is designed to fit mats with a thickness ranging from 8 mm to 15 mm, and our large version fits mats with a thickness from 15 mm to 22 mm.

For ground protection mats with:

- 4 handles (h4), you need 4 connectors.
- 2 handles (h2), you need 2 connectors.

PRODUCT NUMBER	0103 – for panels up to 15 mm thickness 0104 – for panels from 15 mm thickness
ACCESSORIES FOR	DAN-Boards in thicknesses from 8-22 mm
MATERIAL	Stainless steel
SIZES	80 x 94 x 23 80 x 98 x 32

SINGLE CONNECTOR

The two-part design of the Single Connector combines a solid plastic base with a middle section and stainless steel fastening, providing a secure and durable connection. The two elevated bolt towers fit perfectly with DAN-Board ground protection mats with 30 mm holes, ensuring seamless integration and excellent stability in your installations.

KEY FEATURES

Two-part design

Solid plastic base combined with a middle section and secure steel fastening.

Reliable connection

Two elevated bolt towers ensure secure assembly of mat corners.

Perfect fit

Specifically designed for DAN-Boards with 30 mm holes.

Secure fastening

The steel fastening is secured with bolts for stability.

USE

Suitable for construction projects, events, and other industrial applications.

PRODUCT NUMBER	0102
ACCESSORIES FOR	DAN-Boards with 30 mm holes
MATERIAL	Plastic and steel
SIZE	Plastic: 183 x 54,4 mm Steel: 180 x 40 mm

Connector Plus features a two-part design with a durable plastic base and a secure steel top mounting. It is equipped with four elevated bolt towers, making it ideal for connecting up to four corners of ground protection mats simultaneously. It is designed to fit DAN-Boards with 30 mm holes, providing enhanced stability and flexibility for your ground protection mats.

KEY FEATURES

Improved Interconnection

Connect up to 4 board corners at once with the innovative design.

High Compatibility

Custom-designed to fit seamlessly with DAN-Boards featuring 30 mm holes.

Durable Materials

A sturdy plastic base combined with a stainless steel top ensures long-lasting performance.

Increased Flexibility

Ideal for both permanent and temporary solutions. Whether for industrial, construction, or event purposes, Connector Plus guarantees secure results.

U-CONNECTOR

Our U-Connector is designed to efficiently connect DAN-Board ground protection mats while anchoring them securely to the ground. The system fits 40 mm corner holes and is made of strong steel bars. They are an ideal accessory if you need a stable surface of ground protection mats.

FEATURES

Robust construction
Made of durable steel for long-term use.

Secure anchoring
Ensures that the ground protection mats remain stable during use.

Easy installation
Designed for quick and simple assembly without the need for special tools.

USE

The U-Connector is ideal for construction sites, events, and other areas where a stable and cohesive surface of ground protection mats is needed.

HOOK

It can be almost impossible to lift ground protection mats that have been driven into sand or soil, but with our specially designed lifting hook, the process becomes simple. With the efficient lifting hook, you can easily grip a handle or access hole, allowing you to pull the mat free.

Why choose our hook?

The hook is designed to easily grab handles or mounting holes, providing the leverage you need to free ground protection mats without hassle.

The transport boxes combine functionality and quality, ensuring you can always transport and store your ground protection mats safely and efficiently.

Our transport and storage boxes are designed to make work easier and more efficient. Made of galvanized steel, they ensure maximum durability and long service life even under tough conditions. The boxes are tailored for the transport and storage of DAN-Board ground protection mats and are available in various sizes.

With their smart side reinforcement and stackable design, you save space both during transport and in storage. Functionality and strength go hand in hand – an ideal solution for those seeking easy handling and optimal protection for their ground protection mats.

High Quality

Made of galvanized steel for maximum durability and long service life – even under demanding conditions.

Flexible Sizes

Available in different sizes to meet individual needs.

Space-Saving Design

Stackable boxes make it easy to optimize space during transport and storage.

Side Reinforcement

Provides extra stability and ensures your ground protection mats stay in place.

Efficiency and Strength

Designed for easy handling and optimal protection.

Possible handle and hole locations

LOGO

You can order ground protection mats with your own logo and recycling logo. We use laser marking — a method where we simply burn off the top layer of the mats. This ensures that the mats are not weakened.

Please note that the simpler your logo is, the better the result will be. Contact us if you need assistance with a design proposal.

PROCESS

- We redraw the logo
- We create a mockup
- The customer approves
- The logo is converted into a laser file and installed
- Order production begins

REQUIREMENTS FOR FILES

Logos must be provided in the highest possible resolution. Vector files are ideal for easy and quick export of the correct file types. All files imported into the laser software must be in BLACK/WHITE and 2-tone.

Simple logos are preferred: 1-2 lines and not too many extra lines or boxes. The simpler the logo, the larger the print can be.

If you are unsure, have questions, or want a quote, please contact us.

PLASTIC PALLET

The Perfect Companion for Your Ground Protection Mats.

Our 2.050 x 1.000 mm plastic pallet is designed to enhance the storage, transport, and handling of our ground protection mats. This accessory ensures your mats are organized, secure, and ready for deployment in any environment.

KEY FEATURES

Optimized for Ground Protection Mats

Sized to perfectly fit and transport your ground protection mats efficiently.

Robust and Durable

Engineered from high-quality plastic, this pallet withstands heavy-duty use, ensuring longevity.

Hygienic and Easy to Clean

Resistant to moisture, mold, and bacteria, ideal for outdoor use and storage in varying conditions.

Weather-Resistant

Built to perform in challenging environments, including rain, snow, or high humidity.

Sustainable

Made from recycled materials and fully recyclable, supporting eco-friendly operations.
