

DAN-Board

Classic

Tolerances

Length	-0%	+2%
Width	-0%	+2%
Thickness	-0,3 mm	+0,3 mm

Tolerances are based on boards cooled to approx. 20 °C. Deviation between diagonals 1 and 2: ± 15 mm.

Load-bearing

mm	Unpaved wet	Unpaved dry	Paved
6	Pedestrian only	Pedestrian only	1 ton
8	2 ton	4 ton	8 ton
10	2,5 ton	5 ton	10 ton
12	3 ton	7,5 ton	15 ton
15	5 ton	10 ton	20 ton
18	7,5 ton	15 ton	30 ton
20	10 ton	25 ton	45 ton

All data regarding load-bearing capacity depends on factors such as temperature, soil composition, soil bearing capacity and contact areas. The numbers indicate minimum load-bearing capacity.

All figures are approximate and may vary depending on external factors.
