

DAN-Board Xtreme

Tolerances		
Length	-0%	+2%
Width	-0%	+2%
Thickness	-0,3 mm	+0,3 mm

Tolerances are based on boards cooled to approx. 20 °C. Deviation between diagonals 1 and 2: ± 15 mm.

Load-bearing			
mm	Wet unpaved	Dry unpaved	Paved
18	7,5 ton	15 ton	30 ton
20	10 ton	25 ton	45 ton
22	12 ton	27 ton	50 ton

All data regarding load-bearing capacity depends on factors such as temperature, soil composition, soil bearing capacity and contact areas. The numbers indicate minimum load-bearing capacity.

All figures are approximate and may vary depending on external factors.
